India’s EV Dreams in the New Normal

India's remarkable progress in the EV sector has sent shockwaves throughout the entire automotive industry. While the number of EVs (including electric bikes, e scooters, electric cars) in India is still relatively small compared to diesel and petrol-powered vehicles, the growing presence of EVs represents a substantial force that holds the potential to contribute billions to the economy in the coming years. As per current stats, over 9, 80,000 electric vehicles were registered with regional transport offices in 2022 alone. It shows a remarkable threefold increase compared to the previous year, 2021.

Growth story of EVs in India | Electric scooter dealerships

India's electric vehicle sector is on the cusp of a major transformation, with global companies showing immense interest in local manufacturing. Tesla, for instance, has expressed its intention to establish a manufacturing unit in India after Elon Musk’s meeting with Prime Minister Narendra Modi during his US state visit with President Biden, signaling a significant shift towards the country.

Moreover, the surge in electric vehicle sales in India has been phenomenal. Renowned auto manufacturer BMW experienced a notable rise, with 9% of their electric four-wheeler sales in India being attributed to EVs in the first half of 2023. Looking ahead, they anticipate this figure to grow substantially, reaching up to 25% by 2025.

Likewise, other electric two-wheeler brands in India, including Hero, Ola, AMO Mobility Solutions, and Ather, have been witnessing a similar growth trajectory in the EV sector, showcasing the increasing popularity and demand for electric two-wheelers in the country.

As the demand for electric bikes continues to rise in India, the number of **electric bike dealerships** is also increasing rapidly. For instance, AMO Mobility, a prominent **e bike company in India**, has witnessed a substantial expansion in its **e scooter dealerships**, with hundreds of outlets now operating across multiple states and cities in the country.

As of today, the future of EVs in India appears bright, with both global and domestic players contributing to the positive momentum of the industry.

Electric bike prices rising but still affordable

Despite the presence of subsidies, the **prices of electric bikes in India** have witnessed a slight increase. Auto experts assert that the current pricing remains affordable, but the rising costs may have a minor impact on sales. Nevertheless, manufacturers remain steadfast and optimistic about their sales prospects, undeterred by the price hike.

For consumers seeking affordable electric two-wheelers, emerging brands like AMO, Ather, and Okinawa offer viable options. However, most established brands seem reluctant to venture into the more affordable range of products. Despite the price fluctuations, the **electric bike** market in India continues to show promise, driven by growing consumer interest in sustainable and eco-friendly transportation solutions.

Are you craving for an efficient electric bike model in your city? Or can't find a great **electric scooter** dealer nearby? Find more information below. Ensure to check your favorite **e bike price** and range with the showroom.
